

Dear Hiring Team,

I am writing to express my enthusiastic interest in the security-focused role at your organization. With a Master's degree in **Information Security & Management Systems** and a background spanning software development and cloud security operations, I am eager to apply my technical skills to your incident management and security monitoring workflows.

Your requirement for a candidate who understands security controls and documentation aligns perfectly with my experience. During my tenure at **IQVIA**, I managed user permissions and **Identity and Access Management (IAM)** to safeguard sensitive pharmaceutical data. Additionally, my hands-on project building an **Azure SOC & Honeynet** involved integrating telemetry into Log Analytics and using **Microsoft Sentinel** to automate alerts and accelerate incident response.

My qualifications include:

- **Technical Knowledge:** Proficiency in **Python and SQL** , alongside a deep understanding of **ISO 27001, GDPR, and CIS Controls**.
- **Security Monitoring:** Experience writing **KQL queries** and building dashboards to reduce detection and response times.
- **Communication:** A proven track record of coordinating across teams to deliver features and resolve critical system bugs in remote and office environments.
- **Foundational Security:** Relevant coursework in **Risk Management and Cloud Security Auditing**, providing the "basic understanding" required for DLP and endpoint security.

I am highly adaptable, comfortable working within 24/7 rotational shifts, and committed to maintaining high customer satisfaction through timely ticket resolution. Thank you for your time and consideration. I look forward to the possibility of discussing how my security mindset can support your team.

Best regards,

**Pranjal**
